

# INJECTABLES:

## MAINTAIN AND ENHANCE TREATMENT FOR AGING SKIN

Created to address the needs of aging skin, this treatment maintains and enhances injectable procedures by supporting collagen synthesis and regular cell turnover. When performed in a series, it will help reduce the appearance of fine lines, wrinkles, laxity, and dullness.

**FOR BEST RESULTS:** Two weeks after injectable procedure, perform one treatment per month for a series of 6 treatments.

### PRE-TREATMENT SET-UP

#### Materials needed:

- Cotton rounds
- 4x4 rough gauze
- Cotton swabs
- 4x4 soft gauze
- Masque bowl

#### Products needed:

- Gentle Cleanser
- Simply Clean or LHA Cleanser
- Equalizing Toner or LHA Solution
- Blemish + Age Defense®
- Clarifying Clay Masque
- Hydra Balm
- Micropeel 20 or Micropeel 30
- Peel Neutralizer
- Vitamin C Firming Masque
- Equalizing Toner
- Retexturing Activator®
- C E Ferulic®
- Epidermal Repair
- A.G.E. Interrupter (*optional*)
- Sheer Physical UV Defense SPF 50, Physical Fusion UV Defense SPF 50, or Physical UV Defense SPF 30
- Biocellulose Restorative Masque

- 1. PRE-CLEANSE (*optional*)** Remove eye and lip makeup with **Gentle Cleanser** on a pre-moistened cotton round.
- 2. CLEANSE** Cleanse the patient's face carefully with **Simply Clean** or **LHA Cleanser** on 4x4 rough gauze pads. Rinse with 4x4 rough gauze pads moistened with water.
- 3. TONE** Tone and further exfoliate the patient's skin by using **Equalizing Toner** or **LHA Solution** on dry 4x4 rough gauze pads or use soft gauze pads for very sensitive skin.
- 4. EXFOLIATE** Mix 5-7 drops of **Blemish + Age Defense®** with **Clarifying Clay Masque**. Gently massage the mixture on the face for 5 minutes. Dampen as necessary with water to prevent mixture from caking.
- 5. SHIELD** Apply **Hydra Balm** with a cotton applicator to the outer canthus of the patient's eyes, in nasal-labial folds, around the nostrils, on the lips beginning at the vermillion border and any visible irritated areas.
- 6. CHEMICAL PEEL** Pour 5cc of either **Micropeel 20** or **Micropeel 30 Solution** into a plastic medicine cup. The peel solution is applied to the face with soft gauze. Set the timer for 2 minutes and start the timer upon beginning initial application of the acid. Quickly apply one even layer of the Micropeel Solution to the entire face avoiding the eyes and mouth. Leave the acid on the face no longer than 2 minutes from the first stroke. Normal signs of activity include pinkness, mild itching and tingling. Depending on skin condition, erythema and tolerance, the acid may need to be neutralized and removed prior to 2 minutes. To decrease the discomfort during the chemical peel application, a fan can be used.

7. NEUTRALIZE

At the first sign of redness or after 2 minutes, neutralize the entire treated area with 4x4 soft gauze saturated in **Peel Neutralizer**. Continue neutralization until tingling subsides. Once neutralization is complete, rinse the area thoroughly with copious amounts of cold water with saturated 4x4 soft gauze pads.

---

8. CALM & FIRM

Mix equal parts of **Vitamin C Firming Masque** with **Equalizing Toner** and 5-7 drops of **Retexturing Activator**<sup>®</sup>. Apply in a thin veil to the entire treated area using soft gauze.

Apply the **Biocellulose Restorative Masque** to further replenish the skin, leaving on the patient for 7-10 minutes. Remove the masque and rinse remaining **Vitamin C Firming Masque** thoroughly with 4x4 soft gauze pads saturated with cool water.

---

9. PREVENT

Apply 3-5 drops of **C E Ferulic**<sup>®</sup> to the entire face.

---

10. CORRECT

Apply a thin veil of **Epidermal Repair** to treated area. For patients over the age of 40, follow with a dime-sized application of **A.G.E. Interrupter**.

---

11. PROTECT

Apply an adequate amount of **Sheer Physical UV Defense SPF 50**, **Physical Fusion UV Defense SPF 50** or **Physical UV Defense SPF 30** to entire face.
