ADVANCED PIGMENT CORRECTOR

DAILY MULTI-LAYER
TREATMENT TO REDUCE
STUBBORN DISCOLORATION
AND PREVENT
REOCCURRENCE

CORRECT

30 ml / 1 fl oz

“ Once you have the SPF habit down, use a topical product that inhibits melanin production and blocks the transfer of it to the skin’s surface. SkinCeuticals Advanced Pigment Corrector does both. The key with any treatment for hyperpigmentation is to use it diligently day and night—and stick with it! Most of my patients give up after a couple weeks, but brown-spot reduction can take at least 12 weeks, even with prescription strength product. ”

– Dr. Ellen Marmur,
NYC Dermatologist
